Reference manual

STM32F303xB/C/D/E, STM32F303x6/8, STM32F328x8, STM32F358xC, STM32F398xE advanced Arm®-based MCUs

Introduction

This reference manual targets application developers. It provides complete information on how to use the STM32F303xB/C/D/E, STM32F303x6/x8, STM32F328x8, STM32F358xC and STM32F398xE microcontroller memory and peripherals. The STM32F303xB/C/D/E, STM32F303x6/x8, STM32F328x8, STM32F358xC and STM32F398xE devices are referred to as STM32F3xx throughout the document, unless otherwise specified.

The STM32F3xx is a family of microcontrollers with different memory sizes, packages, and peripherals.

For ordering information, mechanical and electrical device characteristics refer to the relevant datasheets.

For information on the Arm® Cortex®-M4 core with FPU, please refer to the *STM32F3xx/STM32F4xx* programming manual (PM0214).

STM32 microcontrollers include STMicroelectronics state-of-the-art patented technology.
